

## Wolf Theiss advises Uniper on the construction of new photovoltaic projects in Hungary

**Budapest, 7 March 2025 – Wolf Theiss has advised Uniper, one of Europe's largest energy companies, on the implementation of photovoltaic (PV) projects in Hungary with a total capacity 151 MWp of renewable energy.**

Uniper is committed to expanding its renewable energy portfolio across Europe, particularly in Hungary, Germany, France, the UK, Italy, Sweden and Poland. As part of this strategy, the company is developing several new PV projects in Hungary, including those in Tét and Dunaföldvár. These projects will not only contribute to Hungary's sustainability objectives but support the transition to sustainable energy in the region. Once operational, the PV plants in Tét and Dunaföldvár will generate enough renewable energy to supply up to 92,000 households. Construction is scheduled to begin later in 2025, with grid connection planned for 2026 and 2027.

Wolf Theiss has provided comprehensive legal support to Uniper in implementing its Hungarian PV projects. This includes advising on the tendering process and assisting with the drafting, negotiation and conclusion of engineering, procurement and construction (EPC) contracts for power plants, producer lines and substations, as well as other construction-related matters.

The core Wolf Theiss team advising on the projects included **László Kenyeres** (Partner, Energy) and **Ádám Lukonits** (Senior Associate, Energy).
